

TexanPlus[®] HMO

Medicare Advantage Health Plans

2012 **FORMULARY** (LIST OF COVERED DRUGS)

PLEASE READ: THIS DOCUMENT
CONTAINS INFORMATION ABOUT
THE DRUGS WE COVER IN THIS PLAN

Note to existing members: This formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take.

Beneficiaries must use network pharmacies to access their prescription drug benefit. Benefits, formulary, pharmacy network, premium and/or copayments/coinsurance may change on January 1, 2013.

UNIVERSAL
AMERICAN

A Healthy Collaboration[®]

What is the TexanPlus® HMO Formulary?

A formulary is a list of covered drugs selected by TexanPlus in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. TexanPlus will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a TexanPlus network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage.

Can the Formulary change?

Generally, if you are taking a drug on our 2012 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2012 coverage year except when a new, less expensive generic drug becomes available or when new adverse information about the safety or effectiveness of a drug is released. Other types of formulary changes, such as removing a drug from our formulary, will not affect members who are currently taking the drug. It will remain available at the same cost-sharing for those members taking it for the remainder of the coverage year. We feel it is important that you have continued access for the remainder of the coverage year to the formulary drugs that were available when you chose our plan, except for cases in which you can save additional money or we can ensure your safety.

If we remove drugs from our formulary, add prior authorization, quantity limits and/or step therapy restrictions on a drug, or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 60 days before the change becomes effective, or at the time the member requests a refill of the drug, at which time the member will receive a 60-day supply of the drug. If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug. The enclosed formulary is current as of August 1, 2011. To get updated information about the drugs covered by TexanPlus, please visit our Web site at www.TexanPlus.com or call 1-800-958-2707, 8:00 a.m. to 8:00 p.m. in your local time zone, 7 days a week (TTY/TDD users should call 1-800-958-2692). A monthly supplemental addendum to the formulary is available at www.TexanPlus.com or call Member Services at the number listed above.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 9. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, “Cardiovascular Agents”. If you know what your drug is used for, look for the category name in the list that begins on page 7. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index that begins on page 53. The Index provides an alphabetical list of all of the drugs included in this document. Both brand name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

TexanPlus covers both brand name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand name drugs.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** TexanPlus requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from TexanPlus before you fill your prescriptions. If you don't get approval, TexanPlus may not cover the drug.
- **Quantity Limits:** For certain drugs, TexanPlus limits the amount of the drug that TexanPlus will cover. For example, TexanPlus provides 30 tablets per prescription for *simvastatin*. This may be in addition to a standard one month or three month supply.
- **Step Therapy:** In some cases, TexanPlus requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, TexanPlus may not cover Drug B unless you try Drug A first. If Drug A does not work for you, TexanPlus will then cover Drug B.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 9. You can also get more information about the restrictions applied to specific covered drugs by visiting our Web site at www.TexanPlus.com.

You can ask TexanPlus to make an exception to these restrictions or limits. See the section, “How do I request an exception to the TexanPlus formulary?” on page 3 for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary, you should first contact Member Services and confirm that your drug is not covered. If you learn that TexanPlus does not cover your drug, you have two options.

- You can ask Member Services for a list of similar drugs that are covered by TexanPlus. When you receive the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered by TexanPlus.
- You can ask TexanPlus to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the TexanPlus Formulary?

You can ask TexanPlus to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make:

- You can ask us to cover your drug even if it is not on our formulary.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, TexanPlus limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover more.
- You can ask us to provide a higher level of coverage for your drug. If your drug is contained in Tier 3, you can ask us to cover it at the cost-sharing amount that applies to drugs in Tier 2 instead. This would lower the amount you must pay for your drug. Please note, if we grant your request to cover a drug that is not on our formulary, you may not ask us to provide a higher level of coverage for the drug. Also, you may not ask us to provide a higher level of coverage for drugs that are in Tier 4.

Generally, TexanPlus will only approve your request for an exception if the alternative drugs included on the plan’s formulary, the lower-tiered drug or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact us to ask us for an initial coverage decision for a formulary, tiering or utilization restriction exception. **When you are requesting a formulary, tiering or utilization restriction exception you should submit a statement from your physician supporting your request.** Generally, we must make our decision within 72 hours of getting your prescriber’s or prescribing physician’s supporting statement. You can request an expedited (fast) exception if you or your doctor believe that your health could be seriously harmed by waiting up to 72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we get your prescriber’s or prescribing physician’s supporting statement.

What do I do before I can talk to my doctor about changing my drugs or requesting an exception?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but your ability to get it is limited. For example, you may need a prior authorization from us before you can fill your prescription. You should talk to your doctor to decide if you should switch to an appropriate drug that we cover or request a formulary exception so that we will cover the drug you take. While you talk to your doctor to determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or if your ability to get your drugs is limited, we will cover a temporary 30-day supply (unless you have a prescription written for fewer days) when you go to a network pharmacy. After your first 30-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility, we will allow you to refill your prescription until we have provided you with a 91- and may be up to a 98-day transition supply, consistent with the dispensing increment, (unless you have a prescription written for fewer days). We will cover more than one refill of these drugs for the first 90 days you are a member of our plan. If you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan, we will cover a 34-day emergency supply of that drug (unless you have a prescription for fewer days) while you pursue a formulary exception.

If you are a current member in our plan, we will also cover a temporary transition supply if you have a change in your medications because of a level-of-care change. This may include unplanned changes in treatment settings, such as being discharged from an acute care (hospital) setting or being admitted to, or discharged from, a long-term care facility. For each drug that is not in our formulary, or if your ability to get your drugs is limited, we will cover a temporary 30-day supply (up to a 34-day supply if you are a resident of a long-term care facility) when you go to a network pharmacy.

For more information

For more detailed information about your TexanPlus prescription drug coverage, please review your Evidence of Coverage and other plan materials.

If you have questions about TexanPlus, please call Member Services at 1-800-958-2707, 8:00 a.m. to 8:00 p.m. in your local time zone, 7 days a week (TTY/TDD users should call 1-800-958-2692). Or visit www.TexanPlus.com.

If you have general questions about Medicare prescription drug coverage, please call Medicare at 1-800-MEDICARE (1-800-633-4227) 24 hours a day/7 days a week. TTY/TDD users should call 1-877-486-2048. Or, visit www.medicare.gov.

TexanPlus Formulary

The formulary below provides coverage information about some of the drugs covered by TexanPlus. If you have trouble finding your drug in the list, turn to the Index that begins on page 53. The first column of the chart lists the drug name. Brand name drugs are capitalized (e.g., COUMADIN) and generic drugs are listed in lower-case italics (e.g., *warfarin*).

The information in the Requirements/Limits column tells you if TexanPlus has any special requirements for coverage of your drug.

- **Prior Authorization** drugs are designated with the abbreviation '**PA.**'
- **Quantity Limit** drugs are designated with the abbreviation '**QL.**' Appendix A lists each drug with the dosage limits per timeframe.
- **Step Therapy** drugs are designated with the abbreviation '**ST.**'
- **Limited Access** drugs are designated with the abbreviation '**LA.**' This prescription may be available only at certain pharmacies. For more information, consult your Pharmacy Directory or call Member Services at 1-800-958-2707, 8:00 a.m. to 8:00 p.m. in your local time zone 7 days a week. (TTY/TDD users should call 1-800-958-2692).
- **High Risk** drugs are designated with the abbreviation '**HR.**' According to medical experts, these drugs may cause more side effects if you are 65 years of age or older, since your body changes with age. If you are taking one of these drugs, ask your doctor if there are safer options available.
- **Gap coverage** drugs are designated with the **asterisk symbol (*)**. We provide additional coverage of this prescription drug in the coverage gap. Please refer to our Evidence of Coverage for more information about this coverage.

Tier Indications

The amount you pay for your prescriptions depends on the medication's tier. The TexanPlus Optimal Med formulary has 4 tiers:

Tier 1: Generic Drugs

Tier 1 is your lowest-cost tier. Most generic drugs on the formulary are included in this tier. Generic drugs contain the same active ingredients as brand drugs and are equally safe and effective. We have also included some preferred brands in this tier which allows you greater access to more drugs at lower prices.

Tier 2: Preferred Brand Drugs

This is your middle-cost tier, and includes preferred brand drugs and some non-preferred generic drugs. Some Tier 2 drugs have lower-cost Tier 1 options. Ask your doctor if you could use a Tier 1 drug to lower your out-of-pocket expenses.

Tier 3: Non-Preferred Brand Drugs

This is your higher-cost tier and includes non-preferred brand drugs and some non-preferred generic drugs. Some Tier 3 drugs have lower-cost Tier 1 or 2 options. Ask your doctor if you could use a Tier 1 or Tier 2 drug to lower your out-of-pocket expenses.

Tier 4: Specialty Tier Drugs

The Specialty tier is your highest-cost tier. A Specialty Tier drug is a very high cost or unique prescription drug which may require special handling and/or close monitoring. Specialty drugs may be brand or generic.

TexanPlus Benefit Design Table

TexanPlus Classic (HMO) Copays		
<i>Tier</i>	<i>30-day supply</i>	<i>90-day supply*</i>
Tier 1: Generic Drugs	\$4	\$10
Tier 2: Preferred Brand Drugs	\$40	\$100
Tier 3: Non-Preferred Brand Drugs	\$80	\$200
Tier 4: Specialty Tier Drugs	33%	33%

*Available through select retail pharmacies.

2012 Therapeutic Classes and Categories

Therapeutic Categories are listed in bold

Therapeutic Classes are listed below each therapeutic category

ADHD/Anti-Narcolepsy

Amphetamines
Stimulants – Misc.

Analgesics and Anesthetics

Analgesics – Anti-Inflammatory
Analgesics – Opioid
Gout Agents
Local Anesthetics
Migraine Products

Anti-Infective Agents

Aminoglycosides
Anti-Infective Agents – Misc.
Antifungals
Antimalarials
Antimycobacterial Agents
Antivirals-Antiretrovirals
Antivirals-CMV Agents
Antivirals-Hepatitis Agents
Antivirals-Herpes Agents
Antivirals-Influenza Agents
Cephalosporins
Fluoroquinolones
Macrolides
Penicillins
Tetracyclines

Antineoplastic Agents

Antineoplastics – Enzyme Inhibitors
Antineoplastics – Hormonal Agents
Antineoplastics – Misc.
Antineoplastics – Monoclonal
Antibodies

Biologicals

Biologicals Misc.
Vaccines

Cardiovascular Agents

Antianginal Agents
Antiarrhythmics
Antihyperlipidemics
Antihypertensives – Angiotensin
Converting Enzyme (ACE) Inhibitors
Antihypertensives – Angiotensin
Receptor Blockers
Antihypertensives – Combinations
Antihypertensives – Misc.
Beta Blockers
Calcium Channel Blockers
Cardiovascular Agents – Misc.
Diuretics
Vasopressors

Central Nervous System Drugs

Antianxiety Agents
Antidepressants
Antipsychotics/Antimanic Agents
Hypnotics

Dermatologicals

Acne Products
Antibiotics – Topical
Antifungals – Topical
Antipsoriatics
Burn Products
Corticosteroids – Topical
Miscellaneous – Topical
Scabicides and Pediculicides
Wound Care Products

Endocrine and Metabolic Drugs

Androgens – Anabolic
Antidiabetics
Calcium Regulators – Misc.
Contraceptives
Corticosteroids
